

REQUIRED: Read This Before Installation and Use

Installation Directions:

1. Insert the CD ROM into your CD Drive and allow the program to auto-run.

[If after a minute auto-run has not begun, go to "My Computer" find D:\ the CD ROM and RIGHT CLICK the icon, then select EXPLORE. Once the CD is open locate the CWautorun.exe icon and double click it.]

2. Next, accept the license agreement and click next.

3. Enter your name and company name and select install.

...When prompted click finish.

With 64 bit operating systems you will be prompted to install 64 bit modules.

...If prompted click install.

To run just double click on the red icon. [username and password on CD jacket]

Need Troubleshooting?: **Quick fix for any error** - <http://checkwriter.net/7/trouble.html>

Before Using CheckWriter™ for the first time: READ THE MANUAL

To access the manual, click the Yellow Question Mark Icon on the CheckWriter™ Toolbar. Before you use the software, it is **required** that you read the following sections of the manual to avoid misusing the software, and to fully understand the functionality.

- About CheckWriter™
- Features and Functions Guide
- Check / Draft Symbology

ATTENTION: Network Edition, Duplex and Enterprise Edition Users ONLY -

- Follow these additional steps. DO NOT install CheckWriter™ on the server.

1. Install a copy of the software on each client machine where CheckWriter™ will be used and test the software by creating a sample record on each terminal. Next, print a test record from each terminal to confirm the software is properly installed and functioning.
2. Next, locate the database file 'cw50.mdb' installed in C:\Program Files\CheckWriter6. With CheckWriter™ closed, right click on this 'cw50.mdb' file and select 'Copy'. Next, paste this file to a shared server drive or other common folder where universal read and write permissions are granted to all users.
3. Once you have located the database on the server or in a central location on the network, open each copy of CheckWriter™ and go to the File Menu, then Options and map each machine to the 'cw50.mdb' file, click OK and close – then reopen CheckWriter™. Once this is complete, print the test record and move to the next terminal until all have been mapped and tested.
